

Betnovate Scalp Lotion

This treatment aims to treat the eczema type skin condition in your ears that causes the itching and can lead to infection of the ear canal (otitis externa).

The treatment is steroid based and may take a couple of weeks to start working.

Using the ear drops

First 2 weeks:

- Warm the bottle to body temperature by holding it in your hand before using them.
- The first time you use them there might be a slight hot or burning type sensation which is normal.
- Put 2 drops onto your finger then rub the lotion into the bowl of your affected ear(s) nightly for 2 weeks then stop

After the first 2 weeks:

- Put 2 drops in the ear when it itches.
